The PowerView® 300 Series features robust, multifunction displays for advanced monitoring of both electronic and mechanical engines.

The PV350 and PV380 displays monitor multiple engine and machine parameters on an easy-to-read 3.8-inch (97 mm) QVGA monochrome LCD. The displays are capable of handling sophisticated engine diagnostics as well as basic engine alarm/shutdown.

Customize the PV300 Series displays using the PowerVision Configuration Studio® software, an intuitive tool designed to make customization simple. Using the software tool, users can customize basic graphics, designate screen layout and define custom parameters.

See the specs on the back of this sheet for a full overview of the PV300 Series.
