DOOR REPLACEMENT SOLUTION FOR LEGACY CAT 3500 EIS-AFRC – KIT# 50-30-10859

FWMurphy's pre-engineered replacement solution for the legacy CAT 3500 EIS-AFRC is suitable for Class 1, Div. 2 Grps B,C & D. With an easy-to-install process, the option can quickly be in place and ready to run.

To replace the door, simply pull the pins and remove the existing CAT ESCM door and harness then replace with FW Murphy's EIS-AFRC Door Replacement Kit. The kit utilizes CAT's original umbilical cord harness terminal block and AFR controller on the back panel. Mounting is provided for the CAT PWM controller from the CAT black box to mount on the new door for quick installation. A new speed potentiometer also is provided with the new door. After hooking up a few labeled, pre-cut wires, you are ready to run. It only takes a few minutes.

FW Murphy's EIS-AFRC Door Replacement Kit part number 50-30-10859 can be used with standard annunciator panels and smart panels.

Features the following:

- CAT Diagnostic Warning Light
- Shut-down Light
- Diagnostic Reset Push Button
- Push-to-Crank Push Button
- Oxygen Calibrate Push button
- Manual Speed Potentiometer with Trim Potentiometer
- Start Enable Relay Output
- Fuel Valve Enable Relay Output
- Ignition Enable Relay Output
- CAT Shut-down Relay Output
- Idle/Rate Selector Switch
