

Ignition Sensors and Cable Assemblies

Ignition Control Systems

FW Murphy offers Hall-Effect sensors, magnetic pickups, retractor/magnet pins and cable assemblies compatible with IntelliSpark® ignition control systems. Operators can choose from five methods of sensor reference when using the FW Murphy IntelliSpark Ignition System.

Features:

- Integrated design for ignition controllers
- Cable assemblies available in varying lengths
- Long-lasting, durable connections

Benefits:

- Makes ignition system installations easier
- Highly accurate sensors for signal information
- Variety fits different engines

How To Order

Hall-Effect Sensors, Cables and Magnet Pins		
Part Number	Description	Notes
72700006	Sensor, Hall Effect, Dual Output, 5/8-18 X 1.8" Thread, 4-Pin 12 mm Micro Connector	
72700213	Sensor, Hall Effect, Dual Output, 5/8-18 X 3.6" Thread, 4-Pin MS Connector	
72700007	Magnetic Pickup, Passive, 5/8-18 X 4" Thread, 2-Pin MS Connector (Once offered as part number 00031022)	
72700193	Magnetic Pickup, Passive, 5/8-18 X 6" Thread, 2-Pin MS Connector	
72700265	Cable Assembly, Shielded, 90 Deg Connector, 4' Stainless, 1/2" NPT, 50' Wire	

How To Order (continued)

Magnetic Pickups, Cables and Reluctor Pins		
Part Number	Description	Notes
00031023	Cable Assembly, Unshielded, 50', 180 Deg /Straight, 2-Pin MS Connector	
72050051	Ferrous Reluctor Pin For Mag Pickup, Ferrous Metal Pole
