

# WHO WE ARE

As a trusted leader in the natural gas compression market, FW Murphy Production Controls offers a broad portfolio of customized compressor control panels as well as engine management, ignition and emission systems.

We bring more than 85 years of experience to the industry as well as superior products, cutting-edge technologies and unparalleled customer support. We provide critical control and protection functionality for compression skid systems. Our expertise lies in enabling emissions compliance and cost reduction of compression equipment ownership.

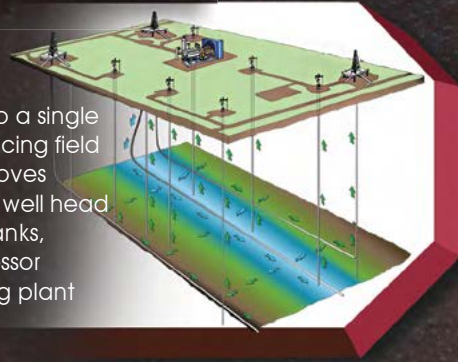

## OUR MARKETS

### WELL HEAD >

Flow lines connect to a single well head in a producing field and compression moves natural gas from the well head to nearby storage tanks, transmission compressor stations or processing plant booster stations.

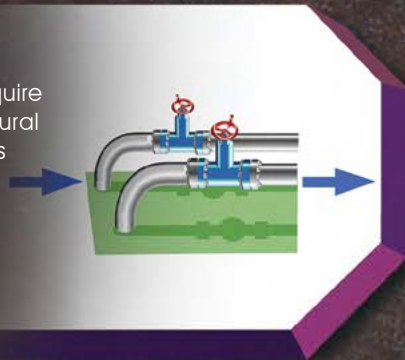

### GATHERING >

Gathering lines collect gas from multiple flow lines and compression moves it to centralized points, such as processing facilities, tanks or marine docks.

### TRANSMISSION >

Transmission pipelines require compression to carry natural gas across long distances or to a distribution center or storage facility.

## ENGINE CONTROL APPLICATIONS

### ∨ EICS® – Engine Integrated Control System

∧ AFR – Air/Fuel Ratio Control

∧ INTELLISPARK® Ignition Performance

### CENTURION®

#### ∨ Equipment Control

M-VIEW® Touch-Screens ∧

#### VIBRATION/SHOCK Monitoring ∧

∧ Lube Level Maintainers or Coolant Level Gauges

### PLC – Custom Applications ∨

∧ MLS – Scrubber Level Control

∧ Pressure Control ∧

## WORKING WITH YOU

### TECHNICAL SALES

With FW Murphy, our technical sales team offers more than just a factory representative. Our account managers have years of field experience and a deep knowledge of FW Murphy solutions. These experts can assist with product management, product demonstrations, training and field support.

### APPLICATION SUPPORT

Our dedicated team builds and maintains personal relationships between FW Murphy and natural gas packagers. As a key resource to packagers, our product specialists evaluate control needs, provide on-site support, assist in problem solving and provide key training.

### CONTROL SYSTEMS & SERVICES (CS&S)

This specialized application engineering group designs standard fleet solutions and extensive custom panels to integrate complex systems. We complete every step from project management, design and engineering, software development, testing and training. Our expertise can be applied to FW Murphy core platforms as well as PLC panels. In-house Factory Acceptance Testing is done to ensure all requirements are met.

### SERVICE

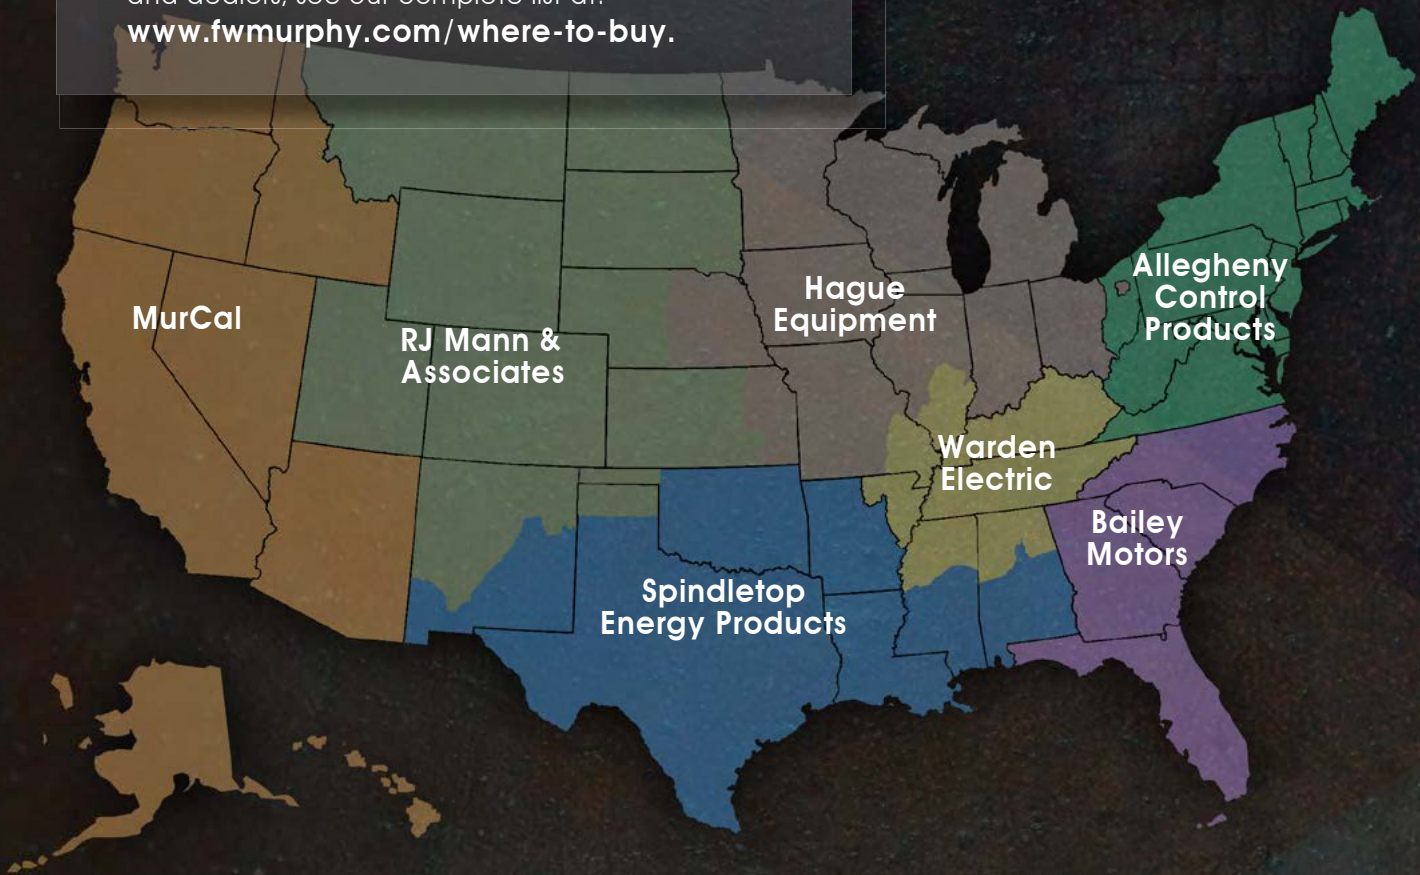

In addition to experts in the field, FW Murphy offers technical service by phone or by scheduled visits. In addition, we provide in-depth training as well as field startup assistance that includes on-site commissioning, troubleshooting and programming.

## WE WORK WHERE YOU WORK

With an extensive network of Master Distributors and International Dealers, FW Murphy is available near you. To find a complete list of Master Distributors and dealers, see our complete list at:
