

CENTURION[®] C5

COMPLETE CONTROL IN YOUR HANDS WITH CENTURION[®]

FW MURPHY'S TRUSTED CONTROLLER, CENTURION C5, INTRODUCES NEW FEATURES, CAPABILITIES AND MORE WITH ITS LATEST SOFTWARE RELEASE.

This new update includes a NEW Configuration Tool, NEW application firmware and NEW display application among many other features.

Also included in the new release is:

- More MX modules (max 4)
- NEW MX-3 I/O Expansion Module option
- New Setup Menu with key configuration selections available with proper password entry
- Function Key opens quick navigation page map to access any other page quickly

What it means to you:

IO Expansion – Maximize digital and analog inputs/outputs exponentially as well as temperature input

- | | | | |
|----------------------------|------------------------|--------------------------------|------------------------|
| • 100 Digital Inputs vs 32 | <div><div></div></div> | • 16 Analog Outputs vs 8 | <div><div></div></div> |
| • 40 Digital Outputs vs 16 | <div><div></div></div> | • 100 Temperature Inputs vs 26 | <div><div></div></div> |
| • 150 Analog Outputs vs 22 | <div><div></div></div> | • 4 Magnetic Pickups vs 2 | <div><div></div></div> |

Enhanced Firmware
Current Release

CENTURION® C5

What it means to you (continued):

Internal Resource Expansion – More resources for the control you need.

◦ 800 Setpoints vs 192

◦ 20 Maintenance Timers vs 10

◦ 500 Events vs 128

◦ 40 States vs 23

◦ 16 Control Outputs vs 8

Enhanced Firmware

Current Release

Additional Features

More system flexibility and tool enhancements

- Support for inverted analog output scales. Invert analog output direction easily for fail open or fail closed actuator changes
- Display hotzones – jump directly to detail pages for input setup, state timers, alarm and shutdown history pages
- Expanded Config mapping with logical vs physical mapping
- New Configuration Tool Report includes labels and Modbus map for key items and faults for self-documenting
- Remote Modbus communicates command support for remote fault shutdown and remote emergency stop
- Non-testable Fault Shutdown event type to designate events that cannot be ignored during test mode
- New display pages to set and view input transmitters health with actual mA or V readouts
- And more!

THERE'S MORE TO CENTURION THAN EVER BEFORE.

CONTACT YOUR STRATEGIC ACCOUNT MANAGER TO SEE THE LATEST IN TOTAL SKID CONTROL.
